DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Puddu '875 in view of Betz et al. '308. Puddu shows the method of performing an osteotomy by resecting a bone at a proper depth, leaving a hinge and inserting a bone plate (Figs. 5-7) but does not show the specifics of the wedge graft. Betz shows a similar device incorporating a wedge (Fig. 3) having smaller inner pieces (43) and larger outer pieces (55), the smaller pieces being inserted first, and various types of materials (column 4, lines 50-550. It would have been obvious to use the wedge of Betz instead of the wedge of Puddu because both are considered obvious art-recognized alternatives bone wedges, well within the knowledge of a skilled artisan, to suit a particular need or application. Limitations drawn to various types of wedge material are considered obvious design choices, old and well known in the bone surgery arts.
